

State of Hawaii 2011 Reapportionment Commission

Adopted Plan for the House of Representatives

Basic Island Unit of Hawaii Population Target 26,327

House District 1 population of 26,628 is 1.14% above the target population.

House district 1 had population increase from the 2001 redistricting of 21,646 to its 2010 population of 23,257. To meet the target population, House district 1 increased in size.

House District 2 population of 25,825 is -1.91% below the target population.

House district 2 had population increase from the 2001 redistricting of 22,334 to its 2010 population of 23,279. To meet the target population, House district 2 increased in size.

House District 3 population of 26,015 is -1.19% below the target population.

House District 3 had population increase from the 2001 redistricting of 20,871 to its 2010 population of 23,425. To meet the plan target population, House district 3 increased in size.

House District 4 population of 27,063 is 2.80% above the target population.

House district 4 had population increase from the 2001 redistricting of 22,141 to its 2010 population of 33,276. To meet the plan target population, House district 4 decreased in size.

House District 5 population of 26,152 is -0.66% below the target population.

House district 5 had population increase from the 2001 redistricting of 21,430 to its 2010 population of 27,586. To meet the plan target population, House district 5 decreased in size.

House District 6 population of 26,418 is 0.35% above the target population.

House district 6 had population increase from the 2001 redistricting of 20,152 to its 2010 population of 26,582. To meet the plan target population, House district 6 decreased in size.

House District 7 population of 26,185 is -0.54% below the target population.

House district 7 had population increase from the 2001 redistricting of 20,103 to its 2010 population of 27,674. To meet the plan target population, House district 7 decreased in size.

Total deviation for the adopted Basic Island Unit of Hawaii plan is 4.71%

Basic Island Unit of Maui Population Target 25,820

House District 8 population of 26,927 is 4.29% above the target population.

House district 8 had population increase from the 2001 redistricting of 20,637 to its 2010 population of 27,894. To meet the plan target population, House district 8 decreased in size.

House District 9 population of 27,044 is 4.74% above the target population.

House District 9 had population increase from the 2001 redistricting of 22,051 to its 2010 population of 27,705. To meet the plan target population, House district 9 decreased in size.

House District 10 population of 24,585 is -4.78% below the target population.

House District 10 had population increase from the 2001 redistricting of 20,375 to its 2010 population of 24,585. House district 10's population fell within deviation limits and no changes were made.

House District 11 population of 24,815 is -3.89% below the target population.

House District 11 had population increase from the 2001 redistricting of 20,496 to its 2010 population of 24,916. To meet the plan target population, House district 11 decreased in size.

House District 12 population of 25,551 is -1.04% below the target population.

House District 12 had population increase from the 2001 redistricting of 22,350 to its 2010 population of 24,992. To meet the plan target population, House district 12 increased in size.

House District 13 population of 25,998 is 0.69% above the target population.

House District 13 had a population increase from the 2001 redistricting of 22,332 to its 2010 population of 24,832. To meet the plan target population, House district 12 increased in size.

Total deviation for the adopted Basic Island Unit plan of Maui plan is 9.52%

Basic Island Unit of Kauai Population Target 22,363

House District 14 population of 22,809 is 1.99% above the target population.

The Technical Committee proposed no changes to the existing representative district lines for House District 14.

House District 15 population of 21,955 is -1.82% below the target population.

Changes to House district 15 were made from recommendations received from the Kauai Reapportionment Advisory Council.

House District 16 population of 22,326 is -0.17% below the target population.

Changes to House district 16 were made from recommendations received from the Kauai Reapportionment Advisory Council.

Total deviation for the adopted Basic Island Unit of Kauai plan is 3.82%

Basic Island Unit of Oahu Population Target 26,787

House District 17 population of 26,937 is 0.56% above the target population.

House district 17 had population increase from the 2001 redistricting of 22,233 to its 2010 population of 24,650. To meet the plan target population, House district 17 increased in size.

House District 18 population of 27,256 is 1.75% above the target population.

House district 18 had population increase from the 2001 redistricting of 21,777 to its 2010 population of 22,281. To meet the plan target population, House district 18 increased in size.

House District 19 population of 27,120 is 1.24% above the target population.

House district 19 had population increase from the 2001 redistricting of 21,865 to its 2010 population of 22,819. To meet the plan target population, House district 19 increased in size.

House District 20 population of 26,898 is 0.41% above the target population.

House district 20 had population decrease from the 2001 redistricting of 22,404 to its 2010 population of 22,303. To meet the plan target population, House district 20 increased in size.

House District 21 population of 26,970 is 0.68% above the target population.

House district 21 had population increase from the 2001 redistricting of 23,562 to its 2010 population of 25,009. To meet the plan target population, House district 21 increased in size.

House District 22 population of 27,693 is 3.38% above the target population.

House district 22 had population increase from the 2001 redistricting of 23,542 to its 2010 population of 25,101. To meet the plan target population, House district 22 increased in size.

House District 23 population of 25,969 is -3.05% below the target population.

House district 23 had population increase from the 2001 redistricting of 23,114 to its 2010 population of 27,871. To meet the plan target population, House district 23 decreased in size.

House District 24 population of 25,889 is -3.35% below the target population.

House district 24 had population increase from the 2001 redistricting of 23,626 to its 2010 population of 24,566. To meet the plan target population, House district 24 increased in size.

House District 25 population of 26,299 is -1.82% below the target population.

House district 25 had population increase from the 2001 redistricting of 23,276 to its 2010 population of 24,157. To meet the plan target population, House district 25 increased in size.

House District 26 population of 26,599 is -0.70% below the target population.

House District 26 had population increase from the 2001 redistricting of 23,574 to its 2010 population of 23,885. To meet the plan target population, House district 26 increased in size.

House District 27 population of 26,173 is -2.29% below the target population.

House District 27 had population increase from the 2001 redistricting of 21,955 to its 2010 population of 22,712. To meet the plan target population, House district 27 increased in size to meet the population target.

House District 28 population of 27,593 is 3.01% above the target population.

House District 28 had a population increase from the 2001 redistricting of 24,595 to its 2010 population of 28,739. To meet the plan target population, House district 28 decreased in size to meet the population target.

House District 29 population of 26,540 is -0.92% below the target population.

House District 29 had a population increase from the 2001 redistricting of 23,186 to its 2010 population of 24,867. To meet the plan target population, House district 29 increased in size to meet the population target.

House District 30 population of 26,787 is 0% of the target population.

House District 30 had a population increase from the 2001 redistricting of 22,897 to its 2010 population of 23,965. To meet the plan target population, House District 30 increased in size to meet the population target.

House District 31 population of 26,149 is -2.38% below the target population.

House district 31 had population decrease from the 2001 redistricting of 24,532 to its 2010 population of 24,482. To meet the plan target population, House district 31 increased in size.

House District 32 population of 27,109 is 1.20% above the target population.

House district 32 had population increase from the 2001 redistricting of 48,815 to its 2010 population of 45,921. To meet the plan target population, House district 32 decreased in size.

House District 33 population of 26,747 is -0.15% below the target population.

House district 33 had a population decrease from the 2001 redistricting of 24,024 to its 2010 population of 23,738. To meet the plan target population, House district 33 increased in size.

House District 34 population of 27,473 is 2.56% above the target population.

House district 34 had population increase from the 2001 redistricting of 25,279 to its 2010 population of 26,009. To meet the plan target population, House district 34 increased in size.

House District 35 population of 26,822 is 0.13% above the target population.

House district 35 had population increase from the 2001 redistricting of 23,384 to its 2010 population of 26,288. To meet the plan target population, House district 35 increased in size.

House District 36 population of 26,502 is -1.06% below the target population.

House district 36 had population increase from the 2001 redistricting of 22,347 to its 2010 population of 22,835. To meet the plan target population, House district 36 increased in size.

House District 37 population of 27,430 is 2.40% above the target population.

House district 37 had population decrease from the 2001 redistricting of 24,851 to its 2010 population of 23,503. To meet the plan target population, House district 37 needed to increase in size.

House District 38 population of 27,461 is 2.52% above the target population.

House district 38 had population increase from the 2001 redistricting of 25,174 to its 2010 population of 34,181. To meet the plan target population, House district 38 decreased in size.

House District 39 population of 26,057 is -2.73% below the target population.

House district 39 had population increase from the 2001 redistricting of 23,850 to its 2010 population of 26,961. To meet the plan target population, House district 39 decreased in size.

House District 40 population of 27,590 is 3.00% above the target population.

House district 40 had population increase from the 2001 redistricting of 25,366 to its 2010 population of 39,045. To meet the plan target population, House district 40 decreased in size.

House District 41 population of 27,706 is 3.43% above the target population.

House district 41 had a population increase from the 2001 redistricting of 23,839 to its 2010 population of 27,009. To meet the plan target population, House district 41 increased in size.

House District 42 population of 27,421 is 2.37% above the target population.

House district 42 had population increase from the 2001 redistricting of 22,580 to its 2010 population of 26,615. To meet the plan target population, House district 42 increased in size.

House District 43 population of 28,086 is 4.85% above the target population.

House district 43 had population increase from the 2001 redistricting of 27,405 to its 2010 population of 43,932. To meet the plan target population, House district 43 decreased in size.

House District 44 population of 26,170 is -2.30% below the target population.

House district 44 had population increase from the 2001 redistricting of 22,281 to its 2010 population of 26,514. To meet the plan target population, House district 44 decreased in size.

House District 45 population of 27,602 is 3.04% above the target population.

House district 45 had population increase from the 2001 redistricting of 21,732 to its 2010 population of 25,150. To meet the plan target population, House district 45 increased in size.

House District 46 population of 27,999 is 4.52% above the target population.

House district 46 had population decrease from the 2001 redistricting of 43,392 to its 2010 population of 42,821. To meet the plan target population, House district 46 decreased in size.

House District 47 population of 25,553 is -4.61% below the target population.

House district 47 had population increase from the 2001 redistricting of 23,932 to its 2010 population of 26,644. To meet the plan target population, House district 47 decreased in size.

House District 48 population of 25,716 is -4.00% below the target population.

House district 48 had population decrease from the 2001 redistricting of 23,933 to its 2010 population of 23,747. To meet the plan target population, House district 48 increased in size.

House District 49 population of 25,772 is -3.79% below the target population.

House district 49 had population increase from the 2001 redistricting of 22,169 to its 2010 population of 22,323. To meet the plan target population, House district 49 increased in size.

House District 50 population of 25,702 is -4.05% below the target population.

House district 50 had population decrease from the 2001 redistricting of 33,783 to its 2010 population of 30,943. To meet the plan target population, House district 50 decreased in size.

House District 51 population of 25,757 is -3.85% below the target population.

House district 51 had population decrease from the 2001 redistricting of 21,882 to its 2010 population of 21,621. To meet the plan target population, House district 51 increased in size.

Total deviation for the Basic island unit of Oahu is 9.46%
